# Our commitment towards sustainability

## MATERIAL SOURCING

We prioritize the use of sustainable and eco-friendly materials in the denim production process. By reducing the demand for conventional raw materials and supporting responsible farming and production practices, we minimize the ecological footprint of denim.

## CHEMICAL MANAGEMENT

We are committed to minimizing the use of harmful chemicals in our production processes. We employ safe and eco-friendly alternatives to traditional chemical treatments, ensuring that the denim manufacturing process is less toxic for workers and the environment.

## WATER CONSERVATION

Denim 91 ensures water-saving technologies and practices are implemented throughout the manufacturing process. By employing innovative dyeing and finishing techniques that require less water and optimizing washing processes, we contribute to water conservation efforts.

## WASTE REDUCTION

We implement waste reduction strategies such as minimizing fabric waste during cutting and optimizing production patterns. Additionally, we actively promote recycling initiatives by reusing denim scraps for other products or partnering with recycling facilities to ensure the disposal of waste materials responsibly.
